README FILE
DIGITAL LITERACY PROJECT
👩‍🎓 Student Information

Name: Sohini Dutta

Registration Number: 25BCE10516

Branch: Btech CSE CORE

Year: First Year B.Tech

Course Code: CSE0001

Course Title: Digital Literacy

📌 Project Overview

This repository contains my Digital Literacy Portfolio Project, created as part of the CSE0001 – Digital Literacy course. In this project, I have taken on the role of a Student Digital Ambassador, where my responsibility is to help my peers understand how to navigate the digital world effectively, safely, and responsibly.

The project is divided into five major tasks, each focusing on a different aspect of digital literacy. These tasks include creating awareness about digital tools, building a professional online presence, exploring coding and collaboration platforms, understanding email etiquette, and learning about cybercrime and its prevention.

All the work has been carefully organized into folders, making it easy to access and evaluate. This repository not only represents my learning but also serves as a foundation for my future digital and professional growth.

🎯 Objectives of the Project

- To understand the concept and importance of digital literacy
- To explore and use modern digital tools and platforms
- To develop a professional online presence
- To learn effective digital communication skills
- To gain awareness about cybercrime and online safety
- To organize and present work using GitHub repository structure

---

📂 Repository Structure

This repository follows a structured format as required in the project guidelines:

```

```

🧩 Detailed Task Description

🔷 Task 1: Digital Literacy Awareness Infographic

In this task, I created a visually engaging infographic using a design tool. The infographic explains important concepts such as:

- What is digital literacy
- Useful digital tools for students
- Safe internet practices
- Professional online presence

This task helped me improve my creativity and ability to present information in a simple and visually appealing way.

🔷 Task 2: Student Digital Portfolio

For this task, I created and updated my profiles on professional platforms such as GitHub and LinkedIn.

- GitHub was used to store and manage my projects
- LinkedIn was used to build my professional identity

This task helped me understand the importance of maintaining a digital portfolio, which will be useful for internships and job opportunities in the future.

🔷 Task 3: Coding & Collaboration Platforms

In this task, I explored both coding and collaboration tools:

- Practiced basic coding on a beginner-friendly platform
- Created a Google Form quiz to test digital literacy awareness

This activity helped me understand how digital tools can be used for both learning and collaboration in academics.

🔷 Task 4: Professional Email & Etiquette Guide

This task focused on improving communication skills. I:

- Wrote two professional emails
- Created a checklist for responsible social media use

It helped me learn how to communicate respectfully and professionally in academic and professional environments.

🔷 Task 5: Cybercrime Awareness Case Study

In this task, I researched a cybercrime scenario and created:

- A detailed case study

- A prevention checklist for online safety

This task increased my awareness of cyber threats and taught me how to stay safe online.

🧠 Key Learnings & Reflections

Through this project, I learned that digital literacy is not just about using technology, but about using it wisely and responsibly. I developed skills such as:

- Critical thinking while using online information
- Creating and managing digital content
- Professional communication through emails
- Awareness of cyber risks and preventive measures

This project also helped me become more confident in using digital platforms for academic purposes.

💡 Challenges Faced

- Choosing the right design and layout for the infographic
- Understanding how to properly structure a GitHub repository
- Maintaining a balance between content and presentation
- Learning new platforms for the first time

Despite these challenges, the process was very engaging and helped me learn practically.

🚀 Future Use of This Repository

This repository will act as:

- A digital portfolio for showcasing my work
- A reference for future academic projects

- A demonstration of my skills to recruiters and mentors

I plan to keep updating this repository with new projects and achievements over time.

✅ Conclusion

This project has been a valuable learning experience that helped me understand the importance of digital literacy in today's world. It enhanced my technical, creative, and communication skills while also making me more aware of online safety. Overall, this project has prepared me to use digital tools more effectively and responsibly in my academic and professional journey.

If you want, I can personalize this with your actual details + make it more aesthetic (GitHub badges, icons, colors) to make your repo stand out 🔥
